

# Electronic Vault Lock

## BRINGING THE SECURITY AND CONVENIENCE OF ELECTRONIC LOCKS TO VAULT APPLICATIONS

The Electronic Vault Lock from Sargent & Greenleaf, the most trusted name in vault locks, combines the security and convenience of the S&G® electronic lock with the durability and dependability of the traditional S&G mechanical vault lock.

### Features:

- Ideal for vault doors, high security safes, and night depositories.
- Same mounting bolt footprint as the S&G® 6400 and 6500 series mechanical vault locks, to allow quick, easy retrofit in most applications.
- Improved security is provided by time and date stamped audit trail, time delay, as well as dual and multiple user modes of operation.
- Available in roller bolt and square bolt models for direct drive and indirect drive applications.
- Incorporates a heavy-duty U.L. Listed S&G® electronic lock with advanced security features.
- Will push and pull up to 1.5 lbs. (0.68 kilogram).
- Bolt position indicator is included as a standard feature.
- Optional Audit Trail Software for fast, precise management of audit information.
- The Electronic Vault Lock automatically relocks when the safe or vault door is closed and the boltwork is thrown.
- Protects against opening by repeated sequential or random code entry attempts.
- Reliable, motor-driven lock bolt operation is powered by 9-volt batteries or an AC adapter.

**Heavy Duty Security and  
Push-Button Convenience**
